

Beaver Run Summer 2023 Improvements

Beaver Run will be working on some major property improvements through the Spring, Summer, and Fall of 2023. We want to make sure attendees are aware of these improvements since they will take place during our conference dates.

The improvements will include balcony work on buildings 1, 2, and 3, along with painting and rock sealing of the entire exterior of the complex. The timeline is to have the conference center painting finished by the beginning of June so that it does not affect our meetings. Guest room buildings will have work taking place throughout May-October and it is Beaver Run's intention is to block guest rooms away from any immediate work during your stay to allow the least impact possible.

These projects are just getting started and you can watch for more details [HERE](#). The building 2 tennis court will be closed for the summer and potentially some other amenities may be temporarily closed.
