Chris Yakscoe Bio
Director of Artificial Intelligence, Netsmart
cyakscoe@ntst.com

As director of artificial intelligence (AI) with Netsmart, Chris works with current clients to optimize their technology platforms and ensure they are using workflows efficiently. He is most proud of Bells, the artificial intelligence (AI) documentation solution, and the difference it makes in the work of clinicians.

Prior to Netsmart, Chris served as vice president of Remarkable Health, where he worked on the team that developed Bells, the popular AI digital assistant. He partnered with clients to successfully implement Bells alongside their EHR and designed strategies to improve documentation and billing processes. Chris routinely speaks at events and as a panelist on webinars sharing the power of effectively using technology to improve the client and staff experience.

Chris is a graduate of the University of Pittsburgh and holds a degree in business administration. He resides in Scottsdale, AZ and enjoys networking and volunteering in the community.
